International Roaming Policy

Document reference TC-POL-001. Issued by TeleCore Communications. This document forms part of the customer agreement and is published in full at telecore.example/policies.

How data, voice and messaging are charged when you use your service outside your home country, what your plan already includes, and the protections that stop a roaming bill running away from you.

1. Purpose and scope

This policy applies to every active consumer, premium and business subscription that has international roaming enabled. It governs charges raised while your device is registered on a partner network outside your home country. Roaming is enabled by default on postpaid plans and disabled by default on prepaid plans.

Charges described here are additional to your monthly plan fee and appear on the bill for the cycle in which the roaming session ended.

2. Roaming zones and standard rates

Every destination belongs to exactly one of four zones. The zone is determined by the network you register on, not by the country you bought your ticket to. Rates below are in USD and exclude tax.

Zone	Region	Data per GB	Voice /min	SMS each
1	Europe and the United Kingdom	9.00	0.25	0.10
2	North America and the Caribbean	21.00	0.45	0.15
3	Asia-Pacific and the Middle East	45.00	0.90	0.25
4	Rest of world	75.00	1.95	0.50

2.1 Zone membership. Zone 1 covers the European Union and EEA, the United Kingdom and Switzerland. Zone 2 covers Canada, Mexico, the Caribbean and Central America. Zone 3 covers Japan, South Korea, Singapore, Australia, New Zealand and the Middle East. Zone 4 covers every other destination, including maritime, in-flight and satellite networks. The full country list is published at telecore.example/roaming-zones.

2.2 Data is measured in decimal gigabytes, where 1 GB is 1000 MB, and is rounded to the nearest 0.01 GB at the end of each session.

2.3 Incoming calls received while roaming are charged at the same per-minute rate as outgoing calls in the same zone. Incoming SMS is always free.

2.4 Zone assignments are reviewed quarterly. A destination will never move to a more expensive zone during your minimum term without 30 days written notice.

3. Roaming included with your plan

Each plan covers a range of zones and a data allowance that may be used inside those zones each billing cycle. Both conditions matter, and section 3.3 explains how they interact.

Plan	Monthly fee	Zones included	Roaming allowance per cycle
Business Pro	110.00	Zones 1 to 3	3.00 GB
Unlimited Max	85.00	Zones 1 to 2	2.00 GB

Plan	Monthly fee	Zones included	Roaming allowance per cycle
Unlimited Plus	65.00	Zone 1 only	1.00 GB
Flex 50GB	45.00	Zone 1 only	0.50 GB
Flex 20GB	30.00	None	None
Prepaid Pay-As-You-Go	0.00	None	None

3.3 How a roaming charge is calculated

The zone you actually used is compared against the zones your plan includes.

- If you roam in a zone ABOVE the highest zone your plan includes, your roaming allowance does not apply at all. Every gigabyte is charged at the standard rate for the zone you used.
- If you roam in a zone your plan DOES include, only the data beyond your allowance is charged, and it is charged at the standard rate of the zone in which it was used.
- Where you roam in more than one zone in a cycle, the allowance is consumed in the order the sessions occurred, and the overage is priced at the zone of each session.

Worked example

```
Business Pro, 7.20 GB used in Japan (Zone 3)
  Zone 3 is included by the plan, so the allowance applies
  Chargeable  = 7.20 GB - 3.00 GB allowance = 4.20 GB
  Charge      = 4.20 GB x 45.00 USD/GB      = 189.00 USD

Flex 50GB, 0.90 GB used in Canada (Zone 2)
  The plan includes Zone 1 only, so no allowance applies
  Charge      = 0.90 GB x 21.00 USD/GB      =  18.90 USD

Unlimited Max, 1.20 GB used in France (Zone 1)
  Zone 1 is included and 1.20 GB is inside the 2.00 GB allowance
  Charge                                    =   0.00 USD
```

3.4 Roaming data is metered separately and does not count towards the domestic fair use threshold described in TC-POL-002. Being throttled at home does not reduce your roaming speed, and roaming heavily does not bring forward a domestic throttle.

3.5 Unused roaming allowance expires at the end of each billing cycle and is not carried forward or refunded.

4. Daily roaming passes

A pass is the cheaper option for anything more than light use, and may be bought before or during a trip. A pass is consumed only on a day you actually use data.

Zone	Price per day	Data included per day	Voice and SMS
1	8.00	1.00 GB	Unlimited within the zone
2	12.00	1.00 GB	60 minutes, 60 SMS
3	15.00	1.00 GB	60 minutes, 60 SMS
4	20.00	0.50 GB	30 minutes, 30 SMS

- A pass day runs for 24 hours from the first data session, not from midnight.
- Data left over at the end of a pass day does not carry into the next day.

- Once the daily data is used the standard zone rate in section 2 resumes, unless you buy a further pass.
- Passes are consumed before any plan roaming allowance.

5. Bill shock protection

5.1 Out-of-allowance roaming data charges are capped at 200.00 USD per billing cycle. The cap is applied automatically to every subscription and no opt-in is required.

5.2 We send an SMS when you reach 50 percent, 80 percent and 100 percent of the cap. At 100 percent, roaming data is barred until you reply to the alert to continue at your own cost for the remainder of the cycle.

5.3 The cap covers data only. Roaming voice, roaming SMS and premium numbers are outside it. Emergency calls are never barred for any reason.

5.4 Business accounts may raise or remove the cap in writing through their account manager. Where the cap has been removed, alerts continue to be sent.

6. Roam-like-home in the European Union

While roaming on an EU or EEA network on a plan that includes Zone 1, calls and SMS to numbers within the EU and EEA are charged at your domestic rate and draw on your domestic allowance instead of your roaming allowance. Data continues to draw on the roaming allowance in section 3, in line with the fair use limits the regulation permits.

7. Disputes and goodwill credits

7.1 A roaming charge may be disputed within 60 days of the date of the bill on which it appeared. Raise a dispute through the assistant, the app, or by calling customer care.

7.2 Where we cannot evidence that a zone entry alert was delivered to you, and the charge is the first of its kind on the account, a goodwill credit of up to 50.00 USD may be applied at our discretion.

7.3 Partner networks may report usage to us up to 30 days late. A late-reported roaming charge may therefore appear on a cycle after the one in which you travelled, and is assessed against the allowances of the cycle in which the usage actually occurred.

8. Definitions

- Billing cycle -- the monthly period ending on your invoice date.
- Roaming allowance -- data usable at no extra charge inside the zones your plan covers.
- Standard rate -- the per-unit price in section 2 for the zone actually used.
- Zone -- the tariff group of the partner network your device registers on.
